

MEMORANDUM

TO: All Station Heads, Site Supervisors, and Personnel Concerned

FROM: CGY

DATE: September 26, 2025

SUBJECT: AMENDED Guidelines on the Installation and Replacement of Tarpaulins

This memorandum amends and supersedes the previous memo on the same subject. In line with our commitment to continuous improvement and the efficient management of company resources, the following amended guidelines for tracking and replacing all posted tarpaulins are to be implemented.

Effective immediately, the following shall be strictly observed:

1. **Marking of Installation Details:** All new tarpaulins posted at any BRDC station, project site, or office must be properly marked **on the back** using a permanent marker. The following information must be clearly and legibly indicated:
 - The complete date of installation (e.g., September 26, 2025).
 - The printed name and signature of the Station Supervisor or the designated personnel responsible for the installation.
2. **Requirement for Replacement Requests:** When submitting a purchase request for a new or replacement tarpaulin, the requesting station or department must provide the following details regarding the tarpaulin being replaced:
 - The exact date the old tarpaulin was installed.
 - The total length of time the tarpaulin was used (e.g., "90 days," "3 months").

This information remains a mandatory component of the purchase request process. Requests lacking these details will be returned for completion, which may cause delays in procurement.

All Station Heads and Supervisors are responsible for disseminating this information to their respective teams and ensuring full compliance with this amended procedure.

Your cooperation is vital as we work together to enhance our operational processes. For any clarifications, please do not hesitate to contact the HR and Administration Department.
